

## Netprinter: Today's technology without the price

The Netprinter from Thomas Electronics offers users the latest in digital imaging technology without the latest price. With its patented Fiber Optic Imaging™ exposure system and reliable, time-proven paper processor, the Netprinter is capable of producing high-quality photographic prints from 4"x6" up to 12"x18" with a resolution of 300 dpi or factory available option of 500 dpi. Every single unit within a package, no matter the size, will feature the same resolution and uniform density.

### Proven and Profitable

In addition to its affordability, the Netprinter's ease-of-use will keep you on-line and profitable. Working with conventional RA-4 chemistry and industry accepted RA-4 photographic paper rolls up to 275', the Netprinter feature an external chemistry replenishment console for hassle-free chemistry management. Its integrated monitor and concealed keyboard handle all internal set-up and maintenance operations with simple, on-screen explanations. The Calibration On Board System ensures consistent image uniformity from image-to-image and day-to-day.

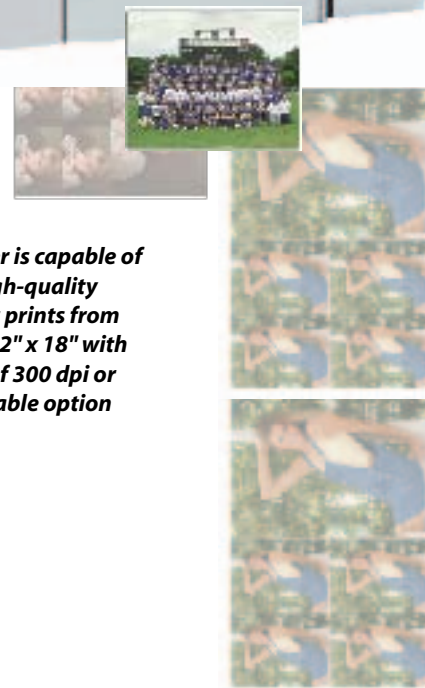

### Seamless Connectivity

As with all new Thomas Electronics digital printers, the Netprinter is designed around a Pentium-based architecture and Ethernet connectivity. The provided CREW system acts not only as an intuitive machine interface, but also allows for seamless use with existing imaging applications. The CREW system accepts standard file formats through direct printer drivers or the CREW Hot Folder Client. This system is ideally suited for scalability; whether it is an additional printer, or any of the other Thomas Electronic digital printers.

### Perfect for all your multi-printing needs

Using the included Aver Suite of imaging software or your existing system, the Netprinter is the perfect device for the digital printing of Weddings, Seniors, school composites and service items, sports, traditional package printing and any custom graphic jobs.

# Netprinter Technical Specifications

## Printer

Exposure System:	Patented Fiber Optic Imaging Technology
Resolution:	300 dpi, or optional 300 and 500 dpi from factory
Print Sizes:	From 4"x6" (127x152mm) up-to 12"x18" (305x457mm), full bleed
Feed Length:	5" through 18" (127mm – 457mm)
Print Speed:	200 - 8" x 10" unique prints per hour at 300 dpi 90 - 12" x 18" unique prints per hour at 300 dpi
Internal PC:	Pentium based PC with monitor, keyboard and mouse
Magazines:	1-12' magazine and the choice of one additional
Calibration:	Microtek ArtixScan 1100

## Paper Processor

Chemical Process:	Conventional RA-4
Paper Transport System:	Roller transport
Replenishment System:	External replenishment console (10L tanks)
Chemistry Level Control:	Automatic evaporation compensation

## Output Media

Type:	Digital color RA-4 paper
Finish:	Glossy, Matte, Luster and Metallic

## Software

Includes:	CREW System: Task Server, Task Generator and Hotfolder Client, Calibration On Board Software, NetOrder Plus Avertools and AverMagic Pro Plus
-----------	--

## Optional Accessories

Additional magazines (4", 5", 6", 7", 8", 10", 11" and 12")  
X-Rite 890 or 891  
500 dpi factory only option

## System

Footprint:	17.5 square feet
Dimensions:	94.2"(L) x 26.7"(W) x 49.3"(H)
Weight:	772 lbs.
Power Requirements:	220V/240V single or three phase (50-60Hz)
Network Interface:	Ethernet 10/100 BaseT
